

CIS Community:

We made it through the first week! We had a few glitches and of course, some minor tech problems but our teachers and students have been flexible and adaptable. Our teachers and staff are working hard to provide the best remote education. We are also working on our plan for the building and policies to ensure a safe return, when that is possible. We will continue to offer multiple methods of learning even after we are allowed to return. We want our students and families to be comfortable and have a choice. If you have questions, comments, or complaints please contact the teachers or me. We are still learning a completely new set of skills so be a little patient with us.

Internet:

We all will have problems at some point, and I have no idea how having 90,000 or more students will affect the system. If you have trouble at home please check to see how many devices are connected to your network, you may have adjust. We are adjusting and finding the most effective way to use our system at the school.

As families try to find a school or program for their children and make changes, we have been pretty stable. We do have a few spots at 7<sup>th</sup> grade, if you know anyone looking for a good program for their 7<sup>th</sup> grader have them call or email Dawn Jackson ([jacksond@corralesis.org](mailto:jacksond@corralesis.org)).

I appreciate all of the support and offers of assistance the school has received.
